

Data Center Services

Application Hosting Services

CUESHIFT

Our secure EMR software is accessible from wherever you are.

FINANCIAL APPLICATIONS

Our billing and financial applications can be accessed securely,

MICROSOFT OFFICE

License Word, Excel, Outlook, Exchange, Powerpoint on an as needed basis.

THIRD PARTY SOFTWARE

We host and support a variety of financial, clinical and specialized systems from other vendors.

WEB SITE & E-MAIL SERVICES

We provide a full range of web design, database administration and e-mail services.

- SaS 70 Certified Data Center
- We host both HSC and Third Party applications
- Tier 1 support for all systems
- 24 / 7 / 365 technical support
- Dell 4 hour warranty service
- Hourly back ups
- HSC staff installs all updates
- HIPPA Compliant

When you host with HSC, we move all of your software applications to our data center where we take responsibility for all upgrades and backups. We provide redundant servers, redundant high speed fiber-optic internet connectivity, redundant power, physical and electronic security, fire suppression systems, server maintenance and system access.

As a company, we decided to be a single-source provider of IT services.

We want our clients to call a single phone number to get assistance with any systems they use. Even if you didn't get the software from us, we will "triage" the incident and contact the people who can resolve the issue. Because of this we have developed relationships with companies who provide high quality systems and services. We can, and do, host software from other vendors.
