

Meal Tracker

Menu, Nutrition and Food Cost Management

MEAL TRACKER DIRECT

Our core module is the most flexible and easiest to use dietary and nutritional menu planning software in the market today.

MealTracker Direct allows your long-term care or assisted living facility to quickly save money on food and labor costs.

NUTRITRACKER

NutriTracker fully integrates with MealTracker and uses the USDA database (over 5,000 items analyzed for 74 nutrients) to quickly and accurately generate your nutritional information needs.

COST TRACKER

CostTracker enables you to connect your MealTracker information to your individual pricing data. You can quickly cost-analyze all food you serve your residents, track your inventory, and stay on budget.

A complete menu management system for your skilled nursing and assisted living facilities.

- Tray Ticket Management
- Intake Analysis
- Menu Analysis
- Recipe Analysis
- Cost Analysis

MealTracker identifies what residents want, need, and like when it comes to food and dietary preferences. Bring whole-person wellness to your dietary department through resident-directed care. Automatically capture resident menu selections, resident weights, likes, dislikes, allergies, etc. at the point of resident care.

As a web-based application, MealTracker Direct eliminates the need to worry about backing up your data, printing issues, hardware issues or connectivity issues. Optimize residents' satisfaction, enhance resident/staff relations, and streamline staff performance with MealTracker today!

Founded in 1985, MEALTRACKER® was the first company to offer dietary management software to senior care facilities. Now with over 1,200 customer facilities, MEALTRACKER® is regarded as an industry leader in user-friendly meal planning, nutrition management and food cost tracking applications with a reputation for outstanding customer support. The professional consulting firm of Edward Kosciw and Associates has issued its highest award for excellence to MEALTRACKER® for three years in a row.

MealTracker is fully integrated with the CueShift EMR modules for Diet Orders, Census & Demographic data.
